*Having the right lighting for your outdoor spaces help create inviting areas to relax and entertain family and friends.*

---

One of the hottest home-lifestyle trends centers on living inside out—as in turning your patio, porch or pergola into an outdoor extension of your home’s interior. No matter what you decide to bring outside – a family room, kitchen or dining room, for example – these new outdoor spaces offer cozy, inviting areas to relax and entertain family and friends while enjoying the soothing and rejuvenating power of being outdoors. To ensure that your outdoor space reflects the same warm ambience and comfort you currently enjoy inside your home, we proudly introduce weather-resistant, outdoor living collections from Show House Feiss, Home Solutions Sea Gull Lighting, and Monte Carlo.

GENERATION LIGHTING

## STONESTRONG MATERIAL

In the toughest climates and conditions imaginable, durable StoneStrong fixtures from Feiss and Sea Gull Lighting will keep your home bathed in the warm, welcoming glow of outdoor lighting.

When you live in a region with a harsh climate; salt, rain, sun, snow, humidity, debris and pollutants can prevail. Feiss and Sea Gull Lighting offer fixtures made from a remarkable proprietary material that's aptly called StoneStrong.

Technically speaking, StoneStrong is a material made from emery rock, ground marble and a latex composite that's bonded together with an industrial adhesive. The emery rock provides strength, the ground marble brings the longevity and the latex composite contributes durability.

It's also rustproof, resists corrosion, fading, fire, acids, and alkalis. You want tough? It's twice as strong as the tensile strength of resin. StoneStrong complies with the Restriction of Hazardous Substances (RoHS) directive set by the European Union.

Moreover, StoneStrong doesn't flinch in the face of high heat or extreme cold, either; it's designed to withstand temperatures ranging from -20° F up to 120° F. Our StoneStrong fixtures scored a five – the top rating – in a 500-hour test for surface hardness and ultra-violet protection conducted by SGS Laboratories (500 hours is the equivalent of five years of exposure).

StoneStrong is superbly suited for coastal regions or other areas where prolonged exposure to the elements comes with the territory. Despite all these brute-strength attributes, StoneStrong can be as decorative as it is durable. Our designers use it to create innovative custom designs that feature finer details and richer textures compared to other manufacturing processes. Think of it as a perfect combination of beauty meets brawn, all backed with a five-year warranty.

*StoneStrong is molded together, enabling custom design capabilities with fine detailing and rich texture.*

## SHOW HOUSE FEISS STONESTRONG COLLECTIONS

Feiss offers eight collections of StoneStrong lighting fixtures, featuring styles, finishes and lamping options as varied as the elements they're designed to withstand.
